Management (IFPSM) - UK

## About IIMM

Indian Institute of Materials Management (IIMM) through its wide network of 48 branches and 19 chapters spread all over the country and with more than 10,000 members, represents a wide spectrum of professionals engaged in the various facets of Materials Management and responsible for planning, sourcing, control and Distribution of materials and services. IIMM through its various training and educational courses is striving to equip these professionals with the latest tools and techniques needed to develop new and innovative approaches to Supply Chain..

## About the Course

A Logistics Management System is a subset of supply chain management (SCM) that deals with the planning, execution and optimization of the physical movements of goods. In simpler terms, it's a logistics platform that enables users to manage and optimize the daily operations of their transportation fleets and

may be part of an enterprise resource planning system. The management of transportation operations of all types, including tracking and managing every aspect of vehicle maintenance, fuel costing, routing & mapping, cargo handling, carrier selection and accounting constitutes an **Integrated Logistics System Management**.

This certificate course is well structured for the participants to understand the intricacies as to how to manage Logistics efficiently and update themselves. Course content is made taking into account of the present scenario. The take away of the course will be the ability to face the challenges in administering the planning and controlling activities of various transportation modes and other logistics requisites.

# Join and Deliberate with SCM Fraternity
