in pursuit of Excellence in Supply Management

ABOUT THE EVENT - SPECTRUM 2026

Spectrum 2026 is the 18th Annual Supply Chain Management Convention of IIMM Chennai and a flagship knowledge platform for supply chain professionals, industry leaders, academicians, and solution providers. Over the years, Spectrum has evolved into a high-impact forum for sharing insights on emerging trends, best practices, and future directions in Supply Chain Management.

Each edition of Spectrum is curated around a contemporary theme reflecting the changing global and Indian supply chain landscape. Spectrum 2026 continues this legacy by focussing on digital innovation, resilience, and sustainability—key imperatives for modern supply chains.

ABOUT THE THEME

Reimagining Supply Chains with AI focuses on how artificial intelligence is transforming the way supply chains are designed, planned, and executed. AI enables organizations to move beyond reactive operations to predictive, adaptive, and intelligent supply chains that can anticipate disruptions, optimize resources, and drive sustainable performance. The theme highlights the role of AI in enhancing decision-making, improving visibility, strengthening resilience, and creating competitive advantage in an increasingly complex global environment.

ABOUT IIMM CHENNAI

IIMM Chennai is one of the most active branches of the Indian Institute of Materials Management, dedicated to advancing excellence in Materials Management, Supply Chain Management, Procurement, Logistics, and Operations. Through conventions, training programs, executive development initiatives, seminars, and student engagement activities, IIMM Chennai promotes professional development, knowledge sharing, ethical practices, and leadership in supply chain management.
